

Service Directory
Medical Plaza 400 Dawsonville

Welcome

Medical Plaza 400 is affiliated with Northeast Georgia Health System (NGHS), a non-profit which serves more than 1 million people in more than 18 counties across the region. As part of NGHS, Medical Plaza 400 provides patients a direct connection to emergency, medical and surgical care at Northeast Georgia Medical Center Gainesville. **Learn more at www.nghs.com**

NGHS's new electronic health record, Epic, is changing the way we deliver care across our Health System. With the use of a single, integrated platform, Epic connects patients and healthcare providers to medical records so that your doctors all have easy access to your complete health history and can collaborate with less barriers, redundancies and inefficiencies.

With Epic, our patients now have access to MyChart, a new online portal that gives you more access and control over your health care — essentially putting you in the driver's seat. With MyChart, you can:

- Manage your appointments
- Get your test and lab results
- Stay in touch with your provider
- Access your family's records
- Manage your medications and request referrals
- pay your bills

Medical Plaza 400

Northeast Georgia Health System offers local access to its award-winning specialty services at Medical Plaza 400 in Dawsonville. Through its urgent care center, imaging center, outpatient lab and numerous physician practices, clinicians and staff provide a coordinated, enhanced patient experience in a beautiful, soothing, healing environment.

108 Prominence Ct.
Dawsonville, GA 30534
nghs.com/mp400

Imaging Center

Inside the Imaging Center, patients can receive advanced technology testing in a soothing environment and enjoy amenities such as warm robes, gourmet refreshments and separate men and women's waiting areas. A board certified radiologist is on-site in Dawsonville each day for faster and more efficient readings.

ACR accredited for MRI, CT, ultrasound and mammography services and are Breast Imaging Centers of Excellence.

Now Offering 3D Mammography

3D mammography (also called tomosynthesis) is a revolutionary screening and diagnostic tool designed for early breast cancer detection that can be done in conjunction with a traditional 2D digital mammogram. 3D mammography works by capturing multiple slices of your breast from different angles, creating a layered 3D image, which helps radiologists see masses and distortions associated with cancer and precancerous cells more clearly than traditional 2D mammography alone. Learn more at nghs.com.

8 a.m. – 5 p.m., Monday – Friday

Urgent Care

Urgent Care provides prompt treatment of illnesses and injuries that require immediate attention, but are not life-threatening. Our board-certified providers care for patients 6 months and older on a walk-in basis and have access to a network of more than 800 physicians if specialty care is needed.
