

# Monoclonal Antibodies

## Criteria to be eligible for monoclonal antibody treatment:

### You must meet all of the following:

1. 12+ years old, weighing at least 80 pounds
2. Confirmed COVID-19 positive
3. Within 10 days of symptom onset
4. Mild or Moderate Illness
  1. *Mild Illness*: Individuals who have any of the various signs and symptoms of COVID-19 (e.g., fever, cough, sore throat, malaise, headache, muscle pain, nausea, vomiting, diarrhea, loss of taste and smell) but who do not have shortness of breath, dyspnea or abnormal chest imaging.
  2. *Moderate Illness*: Individuals who show evidence of lower respiratory disease during clinical assessment or imaging and who have saturation of oxygen (SpO<sub>2</sub>) ≥94% on room air at sea level.

### In addition, you must meet at least one of these risk factors:

1. Age 65+ years
2. BMI over 25 kg/m<sup>2</sup> or if age 12-17, have BMI ≥85th percentile for their age and gender based on CDC growth charts.
3. Pregnant
4. Chronic Kidney Disease
5. Diabetic
6. Immunosuppressive disease or immunosuppressive treatment
7. Cardiovascular disease (including congenital heart disease) or hypertension
8. Chronic lung diseases (for example, chronic obstructive pulmonary disease, asthma[moderate-to-severe], interstitial lung disease, cystic fibrosis and pulmonary hypertension)
9. Sickle cell disease
10. Neurodevelopmental disorders (for example, cerebral palsy) or other conditions that confer medical complexity (for example, genetic or metabolic syndromes and severe congenital anomalies)
11. Have a medical-related technological dependence (for example, tracheostomy, gastrostomy or positive pressure ventilation (not related to COVID 19))
