

happy national medical librarians month!

Northeast Georgia Health System is very lucky to have two professionally-trained medical librarians who are available to help patients and families find quality and easy-to-understand health information about medical symptoms, conditions, and treatments. The information provided by the librarians allows visitors to make healthy choices and become active, informed partners in their healthcare.

We know at NGHS, that librarian-led information services significantly contribute to our institution's mission. We provide better care with information from medical librarians.

To learn more about all the incredible services we have at NGHS, check out nghs.com/library.

THANK YOU SHANNON AND TANISHA FOR ALL YOU DO!

To schedule an appointment with a librarian or to ask a health information-related question, please contact the **Fraser Resource Center at 770-219-5216** or the **Braselton Resource Center at 770-848-7145**.

You can also email library@nghs.com for assistance.
